Professional Summary

I am Luis Balsamo, a front-end developer specialized in React and TypeScript, passionate about creating dynamic and interactive interfaces with a strong focus on user experience. In my current role, I work with Laravel for back-end development, and I am driven to expand my skills to Python frameworks such as Flask and Django. I aim to merge front-end expertise with back-end knowledge, contributing as a versatile developer.

Professional Experience

Join Ads Network | Front-end Developer | Jun 2022 - Present

Developed user-friendly and efficient interfaces using React and TypeScript, with Material-UI for a consistent user experience. Extended backend support with Laravel, creating automated systems for issue management. Managed server configurations on DigitalOcean to optimize performance.

Certifications

Flask Certification - Web Development with Flask

Python Certification - Advanced Web Development

Flask Study Project - Created a games listing application
